

The Framework for Teaching

The Framework for Teaching is a research-based set of components of instruction, aligned to the INTASC standards, and grounded in a constructivist view of learning and teaching. The complex activity of teaching is divided into 22 components (and 76 smaller elements) clustered into four domains of teaching responsibility:

1. Planning and Preparation
2. Classroom Environment
3. Instruction
4. Professional Responsibilities

Each component defines a distinct aspect of a domain; two to five elements describe a specific feature of a component. Levels of teaching performance (rubrics) describe each component and provide a roadmap for improvement of teaching.

The Framework may be used for many purposes, but its full value is realized as the foundation for professional conversations among practitioners as they seek to enhance their skill in the complex task of teaching. The Framework may be used as the foundation of a school or district's mentoring, coaching, professional development, and teacher evaluation processes, thus linking all those activities together and helping teachers become more thoughtful practitioners.
