

## **Proof of School Dental Examination Form**

Illinois law (Child Health Examination Code, 77 III. Adm. Code 665) states all children in kindergarten and the second, sixth, and ninth grades of any public, private, or parochial school shall have a dental examination. The examination must have taken place within 18 months prior to May 15 of the school year. A licensed dentist must complete the examination and sign and date this Proof of School Dental Examination Form. If you are unable to get this required examination for your child, fill out a separate Dental Examination Waiver Form.

This important examination will let you know if there are any dental problems that need attention by a dentist. Children need good oral health to speak with confidence, express themselves, be healthy, and be ready to learn. Poor oral health has been related to lower school performance, poor social relationships, and less success later in life. For this reason, we thank you for making this contribution to the health and well-being of your child.
